
hresult (solid) vs Hubble Ratio (dashed) ($\upsilon_2 = -4/3$)
$\varsigma = 0.85$ (hresult)
$\varsigma = 0.90$ (hresult)
$\varsigma = 0.95$ (hresult)
$\varsigma = 1.00$ (hresult)
$\varsigma = 1.05$ (hresult)
$\varsigma = 1.10$ (hresult)
$\varsigma = 1.15$ (hresult)
Value
Scale Factor a

hresult (solid) vs Hubble Ratio (dashed) ($\varsigma = 1.0$)
$\upsilon_2 = -2.000$ (hresult)
$\upsilon_2 = -1.500$ (hresult)
$\upsilon_2 = -1.333$ (hresult)
$\upsilon_2 = -1.000$ (hresult)
$\upsilon_2 = -0.500$ (hresult)
Value
Scale Factor a
